

GA4 Traffic Report

Domain: All Domains | **Period:** 2026-07-04 – 2026-08-02 (30 days) | **vs.** 2026-06-04 – 2026-07-03 (30 days)

Executive Summary

Overall traffic declined by 13.4% during this period, heavily influenced by softening Direct and Organic Search volume. The critical finding is a severe 53.8% crash in Key Events, driven by conversion rate collapses in Email and Paid Search. The immediate priority is an end-to-end audit of conversion tracking and lower-funnel landing pages.

Sessions 1,091,525 ▼ 13.4% vs prior	Total Users 946,821 ▼ 13.6% vs prior
Engagement Rate 15% ▲ 2.7 pts vs prior	Conversion Rate 0.4% ▼ 0.4 pts vs prior
Key Events 4,683 ▼ 53.8% vs prior	

Key Takeaways

Traffic: Sessions declined 13.4%, primarily driven by a 144k drop in Direct traffic and a 19% pullback in Organic Search.

Quality: Engagement rate improved by 2.7 percentage points, showing that the retained traffic base is interacting more deeply with the site.

Conversions: Total key events fell sharply by 53.8%. Conversion rates halved, largely pulling down the overall site efficiency.

Channels: Direct remains the dominant volume driver, but Email conversions fell drastically. Paid Other demonstrated strong growth (+60.5% sessions).

Core Metrics

Metric	Current	Previous	Change	Status	Driver
Sessions	1,091,525	1,259,786	▼ 13.4%	↘ Declining	Direct & Organic Search drops
Total Users	946,821	1,096,555	▼ 13.6%	↘ Declining	Lower top-of-funnel acquisition
New Users	946,821	1,096,555	▼ 13.6%	↘ Declining	Fewer new visitor sessions
Engagement Rate	15.2%	12.5%	▲ 2.7 pts	↗ Improving	Higher interaction from retained users
Avg. Duration	1:25	1:30	▼ 5.5%	↘ Declining	Slightly shorter page visits

Metric	Current	Previous	Change	Status	Driver
Pages / Session	1.10	1.13	▼ 2.6%	— Stable	Consistent browsing depth
Key Events	4,683	10,136	▼ 53.8%	↓ Alert	Email & Paid Search efficiency loss
Conversion Rate	0.4%	0.8%	▼ 0.4 pts	↓ Alert	Broad channel conversion drop

Top Pages

Page	Sessions	Change	Conv. Rate	Change	Action
/	63,193	▼ 24.4%	0.04%	-	Fix
/campaigns/who-is-marketing	33,888	▲ 159%	0.0%	-	Scale
/field-notes/opticon	9,113	▲ 248%	0.56%	▲ 0.02 pts	Scale
/hc/en-us	7,215	▼ 12.2%	0.0%	-	Optimize
/products/ai	7,351	▲ 14.3%	0.01%	-	Optimize

Opportunities

- The "/campaigns/who-is-marketing" page saw a massive 159% traffic surge but yielded a 0% conversion rate. Implement aggressive, above-the-fold calls-to-action to capture this top-of-funnel momentum.

Channel Performance

Channel	Sessions	Change	Conv. Rate	Change	New Users	Priority
Direct	882,284	▼ 14.0%	0.13%	▲ 0.01 pts	845,557	High
Organic Search	82,889	▼ 19.0%	0.33%	▼ 0.42 pts	24,391	High
Referral	28,881	▲ 11.2%	0.56%	▼ 0.21 pts	5,541	Medium
Paid Social	28,346	▲ 86.4%	0.15%	▼ 0.77 pts	27,327	Medium
Paid Search	17,730	▼ 20.5%	1.04%	▼ 0.94 pts	10,822	High
Paid Other	13,890	▲ 60.5%	7.66%	▼ 0.24 pts	11,160	Medium
Email	12,501	▼ 43.4%	4.55%	▼ 3.12 pts	6,547	High

Insights

- Email traffic dropped 43.4% and its conversion rate fell by 3.12 points. Audit recent email deployments for broken links or misaligned landing page messaging.

Action Plan

⚡ Immediate (Week 1–2)

Audit Conversion Tracking & Email Funnels

Finding: Total Key Events crashed by 53.8% period-over-period, largely due to Email and Paid Search conversion rate drops.

Action: Conduct an immediate end-to-end audit of GA4 conversion event tags and lower-funnel landing pages for these channels.

Impact: Restore baseline tracking reliability and recover up to +50% of missing key events.

Short-term (Month 1)

Monetize Campaign Traffic Surges

Finding: The "/campaigns/who-is-mark-eting" page scaled traffic by 159% (33.8k sessions) but generated no tracked conversions.

Action: Deploy aggressive above-the-fold lead capture forms or exit-intent offers tailored to the campaign audience.

Measure: Achieve a >0.5% session conversion rate on this specific landing page.

🌐 Strategic (Quarter)

Stabilize Organic Search Visibility

Rationale: Organic Search traffic fell 19% alongside a 24% drop to the homepage, indicating eroding search visibility for core brand terms.

Roadmap: Execute a technical SEO audit, refresh legacy top-performing content, and optimize the `/hc/en-us` support pages for long-tail query capture.

Alerts

Watch: Organic Search and Direct traffic volumes are trending downward by >10%. Monitor these primary acquisition channels closely for continued erosion.

Risk: The 53.8% reduction in Key Events is a critical business risk. If tracking tags are functioning correctly, this indicates a massive breakdown in lower-funnel user experience or offer alignment.
